Lesson - [Value for Users and Business](#)

1. What is a key indicator of a product's usefulness?

Your Answer : Solving user-specific problems ✓

Description : A key indicator of a product's usefulness is its ability to effectively solve user-specific problems or meet their specific needs. Products that address user pain points and deliver meaningful solutions are more likely to be perceived as useful.

Question Reference From : Usefulness & Usability

-
2. In the context of UX design, why is adherence to accessibility standards like WCAG important?

Your Answer : To ensure designs are accessible for all users ✓

Description : Adherence to accessibility standards like WCAG is important to ensure that digital designs are accessible to users with disabilities. It goes beyond legal requirements to promote inclusivity and provide equal access to information and services online.

Question Reference From : Searchability & Accessibility

-
3. What aspect of UX does Reflective Design primarily influence?

Your Answer : User's long-term relationship with the product ✓

Description : Reflective Design considers how a product fosters meaningful connections and perceptions over time, influencing user loyalty, satisfaction and brand affinity through continued positive experiences.

Question Reference From : Value for Users and Business

-
4. What does Situational Design aim to achieve?

Your Answer : Context-specific utility of a product ✓

Description : Situational Design aims to optimize the usability and relevance of a product in specific contexts or situations, ensuring that it meets user needs effectively under varying conditions.

Question Reference From : Value for Users and Business

-
5. How does consistent branding affect a product?

Your Answer : Enhances Desirability and Credibility ✓

Description : Consistent branding helps in building trust and recognition among users, enhancing the product's desirability by ensuring a coherent and reliable user experience across all interactions.

Question Reference From : Desirability & Credibility

-
6. What should be the primary focus when developing a new fitness app to accommodate users with different levels of physical ability?

Your Answer : Accessibility ✓

Description : Accessibility should be the primary focus when developing a fitness app to ensure it accommodates users with varying physical abilities.

Question Reference From : Peter Morville's Seven Key Success Factors for UX

7. What aspect of UX is primarily influenced by 'desirability'?

Your Answer : User Engagement ✓

Description : Desirability in UX focuses on how appealing and engaging a product is to its users. It influences factors such as user satisfaction, enjoyment and emotional response, all of which contribute to higher user engagement.

Question Reference From : Desirability & Credibility

8. Why is user feedback crucial in UX design?

Your Answer : To identify areas for improvement ✓

Description : User feedback provides direct insights into how users perceive and interact with the product, highlighting pain points, usability issues and opportunities for enhancement, which are essential for iterative design improvements.

Question Reference From : Desirability & Credibility

9. What does usability primarily assess in a product?

Your Answer : Ease of Use ✓

Description : Usability primarily assesses the ease with which users can interact with and use a product. It includes factors such as navigation, efficiency, learnability and error handling, all aimed at enhancing the overall user experience.

Question Reference From : Usefulness & Usability

10. What does Epistemic Value in a UX product focus on?

Your Answer : Knowledge and Learning ✓

Description : Epistemic Value emphasizes the acquisition of knowledge, skills and understanding by users through the product, enhancing educational or informational aspects that contribute to its overall value proposition.
